## Education

- 2022–2026**  
University of Cagliari | Ph.D.  
Electronic & Computer Eng.  
*cum laude*
- 2020–2022**  
University of Cagliari | M.Sc.  
Internet Engineering  
*110/110 cum laude*
- 2016–2020**  
University of Cagliari | B.Sc.  
Computer Engineering  
*96/110*
- 2011–2016**  
ITC G.P. Chironi  
Business Information Systems

## Languages

- Italian: Native
- English: B2

## Soft Skills

- Public speaking
- Scientific writing
- Entrepreneurial mindset & innovation
- Problem solving & adaptability
- Project management

## Other

- CAPM® Certification – Project Management Institute
- 20+ publications (IEEE/MDPI/Elsevier)

UPDATED ON APRIL 13, 2026

# Giovanni Pettorru

Ph.D. in Electronic and Computer Engineering specializing in Next-Generation IoT. Expertise in bridging the gap between advanced scientific research and scalable, real-world technological solutions, with a proven track record in global research environments and high-impact technology acceleration programs.

## Experience

- 2026 – Present**
  - Post-doc Researcher* — Designed drone-based acquisition and localization solutions for spatial audio and immersive environments.
- 2025–2026**
  - Adjunct Professor* — Didactics for Telecommunication Systems.
- 2025–2026**
  - Freelance Worker* — Developed an IoT-based platform for monitoring agricultural parameters and supporting decision-making.
- 2021–2026**
  - Tutor & Teaching Assistant* — Telecommunication Networks, Network Security, Cloud Networking, and Digital Media.
- 2021–2023**
  - Freelance Worker* — Designed data acquisition algorithms and urban monitoring systems for critical situations.

## Innovation & Awards

- 2026**
  - SERICS* — Selected for the Silicon Valley acceleration program in San Francisco with the Green-Shield Network Security project.
- 2025**
  - Start Cup Sardegna* — Top 10 finalist with Disaster Management System (LENS) project; “Climate Change” special mention.
- 2025**
  - AgriFuture | Sardegna Ricerche* — Selected with AGROS among the top 10 high-tech innovative ideas for the agri-food sector.
- 2023–2025**
  - IEEE ComSoc 3MT/4MT* — Three-time Finalist in international Three/Four-Minute Thesis competitions; two-time third place.
- 2024**
  - Start Cup Sardegna* — Top 10 finalist with AGROS; Second prize (Spoke 7 of the e.INS).

## Technical Skills

- Networking & Protocols** — Secure, low-latency protocols (HTTP/3, WebSocket, MQTT) and wireless technologies (LoRa, WiFi, Bluetooth) for IoT.
- Cybersecurity** — IoT Security via telemetry analysis and traffic classification. Data obfuscation and encryption for privacy-preserving communications.
- Data Analytics & Signal Processing** — Development of GPS-free localization systems using wireless signal processing.
- Full-Stack Development** — End-to-end design from Physical Layer to Cloud. HTML/CSS (Frontend), Node.js/Express (Backend), MongoDB and SQL databases.
- Programming & Tools** — Python and MATLAB for algorithm development; C/C++ for IoT devices. Linux, Git, Wireshark, Generative AI proficiency.
